Gabriel Vidal Salazar

Hoisting

```
function catName(name) {  
    console.log(`My cat's name is ${name}`);  
}  
  
catName('Tigger');
```

```
catName ( ' Tigger' ) ;
```

```
function catName(name) {  
    console.log(`My cat's name is ${name}`);  
}
```

```
catName ( ' Tigger' ) ;
```

```
function catName(name) {  
    console.log(`My cat's name is ${name}`);  
}
```

```
console.log(num) ;  
var num;  
num = 6;
```

```
num = 6;  
console.log(num);  
var num;
```

Scope

Scope

- `var` y `function` tienen scope de función
- `let` y `const` tienen scope de bloque

Closure

```
function f1() {  
    const v1 = 1;  
    const v2 = function() {  
        console.log(v1);  
    };  
    return f2;  
}
```

```
var testFunction = f1();  
testFunction(); // 1
```
